

VisiBadge Pro

VisiBadge Pro allows complete visitor control, pass printing, reports, Health and Safety compliance with the addition of improved network support, pre-booking facility and barcode swipe control. By entering details in to VisiBadge Pro a comprehensive searchable history is created, and a professional looking official pass is printed for each visitor.

The added feature of pre-booking and barcode swiping vastly improves speed when a visitor arrives at your premises. Pre-booking gives staff at the reception or gatehouse the ability to pre-book any visitor on to the VisiBadge system. By pre-booking visitors, queues can be greatly reduced to ease congestion in the reception area. Simply select the pre-booked visitor from a list by double-clicking on their name. The barcode reader provides fast booking of pre-printed and pre-booked visitor passes. At the same time, it records the date and time that the swipe was made, giving a full audit trail of visitor traffic. By entering visitor details in-to VisiBadge Pro, a comprehensive searchable history is created and a professional visitor pass is printed giving every visitor an official visitor/contractor pass.

VisiBadge Pro is upgradeable to VB Pro Ex and VB Flex
