

Room Resource Manager

VB Room Resource Manager software can be used as a stand-alone system or be integrated with other modules across the VisiBadge Select suite. Room Resource Manager allows a multi-room booking system to oversee the reservation of up to 250 rooms from a single reference point. This easy to use software is of the great benefit to all organisations that need to manage bookings of any kind..

You can also create a room components list for refreshments, projectors, number of chairs etc. and even keep a record of the costs involved, if applicable.

At its simplest, it allows a calendar view of the day/week/month's bookings listed by order of rooms/buildings, cross-referenced against the dates/times of the bookings.

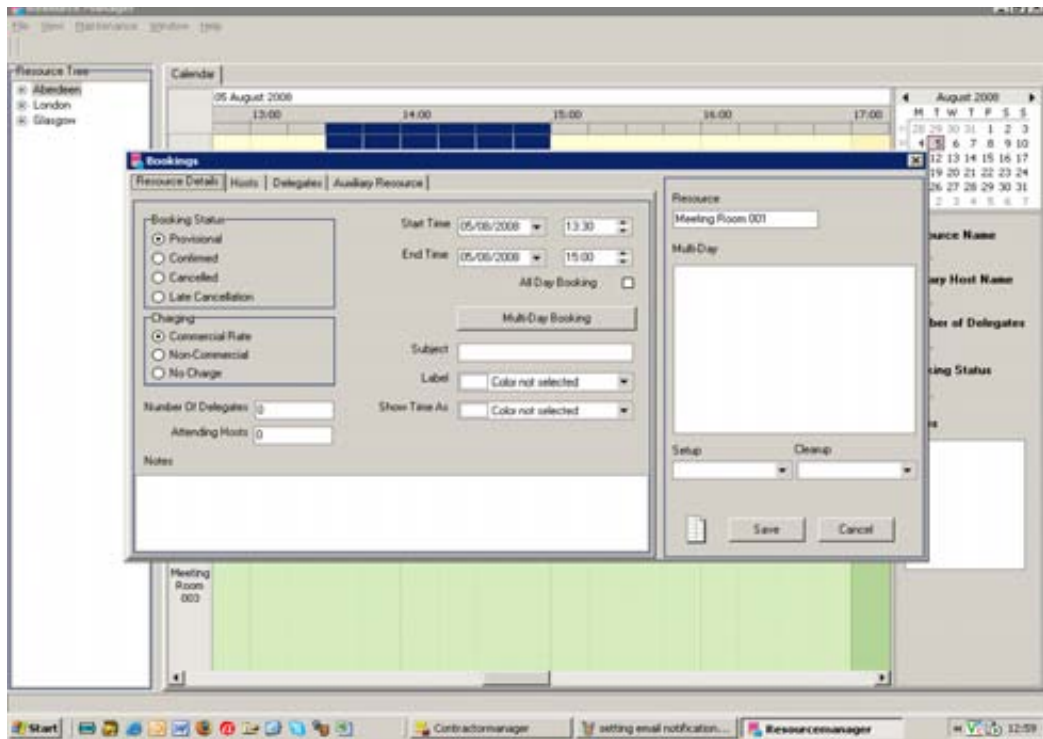

FEATURES

- Multiple users
- Provisional bookings, pending confirmation by the administrator
- E-mail confirmations (via Outlook)
- Recurring bookings
- Bookings up to two years in advance
